

# NixC

Thank you for your support!

To use NixC simply connect the power supply to the wall socket and set the time using two buttons on the bottom. Press first button to enable hour change and continue pressing second button to change the number, next press the first button again to enable minutes change and proceed similarly. At the end to finish, press the first button again.

To change backlight colour, turn the knob at the bottom. Position at one end switches the backlight off, turning the knob to the other end changes colour going through the whole colour wheel and turns white on at the other end. Similarly, it is controlled with mobile app represented by values 0-100 (0 – Off, 100 – white).

## Remote Control with Phone

To control NixC with iPhone:

1. Download **HM10 Bluetooth Serial** app.
2. Open app and in the tab **Connect**, connect to NixC
3. Available options will be displayed.  
Type corresponding numbers and press send.

To control NixC with android download **Serial Bluetooth Terminal** app and proceed similarly. Before using the app you have to change parameter in **Settings > Send > Newline > None**.
